

ECHO₂ Plus Oxygen Treatment System™

Oxyceuticals™ Acne Home Care Kit

A home care regimen by the client/patient is of paramount importance in any acne treatment program. Proper hygiene (keeping the skin as clean and free of pathogenic bacteria as possible) between treatments is perhaps the most crucial factor in the success of this or any other treatment for acne.

This ***Oxyceuticals™ Home Care Kit*** was designed to provide the professional skin care provider with the perfect tool to assist his/her clients with the maintenance of their acneic skin condition inbetween regular in-spa professional facial treatments.

For maximum effectiveness, the acne patients should be instructed to use ***Oxyceuticals™ Home Care Kit*** exclusively for this period and return for additional professional ***Oxyceuticals™*** acne treatments. This regimen should be continued and repeated until no further breakouts occur.

Each of the ***Oxyceuticals™ Home Care Kit*** contains the following four individual products:

Tea Tree Foaming Cleanser

The Oxyceuticals™ Tea Tree Foaming Cleanser is a gentle cleanser with proven blemish fighting ingredients, including genuine **Australian Tee Tree Oil**. Non-irritating and non-drying, Tea Tree Foaming Cleanser clears and minimizes blemishes.

Medicated Exfoliating Astringent

The Oxyceuticals™ Medicated Exfoliating Astringent helps heal blemishes without drying the skin. Contains salicylic acid, along with comforting Aloe Vera, Witch Hazel, vitamin B5 and vitamin E to calm inflamed skin. Medicated Exfoliating Astringent contains salicylic acid, which helps clear the skin by gently loosening dead skin cells, reducing inflammation and killing harmful bacteria. By using this product the skin will be cleaner, healthier and breakouts will be less likely.

Advanced UV Protector, SPF 20 (Day Time Moisturizer)

The Oxyceuticals™ Advanced UV Protector SPF 20 contains pure Titanium and Zinc, nature's best mineral sunscreens. Advanced UV protector provides superior protection from harmful UVA and UVB rays by utilizing the advanced technology of **SunSpheres®**, a revolutionary water encapsulating element. **SunSpheres®** uses water's reflecting properties to gently enhance the sun-protection provided by Advanced UV Protector.

The Oxyceuticals™ Oxygen Enriched UV protector is designed to be used during the day for protection from the sun's damaging effects. This revolutionary sun blocker can be worn under the makeup if desired.

Oxygen Enriched Calming Lotion (Night Moisturizing Lotion)

The Oxyceuticals™ Oxygen Enriched Calming Lotion contains encapsulated pure oxygen, which is released onto the skin when the lotion is applied. Oxygen is an excellent bactericidal agent and will help keep unhealthy bacteria in check. In addition to beneficial oxygen, Oxygen Enriched Calming Lotion contains natural Aloe Vera, Pro vitamin B5, and a host of botanical extracts proven to calm inflamed acneic skin, reducing inflammation, redness and swelling.

The individual products in each **Oxyceuticals™ Home Care Kit** are designed to last for up to 10 days if used twice daily as recommended. Easy to follow instructions are located on the inside lid of each kit. If used as directed, the acne patient's skin will stay clean and properly hydrated, and new lesions will be effectively controlled.

The professional skin care provider should read the instruction for use, precautions and ingredients labeling information prior to making these products available to his/her clients, and to call his/her Echo₂Plus distributor with any questions he/she may have.

Caution:

- If the user of the Oxyceuticals Acne home care treatment is under a physician's care, he/she must consult the physician **prior** to performing this or any other home care treatment.
- Cover eyes with moistened cotton pads. Do not get product in eyes or on lips.
- Do not use products to remove eye makeup.
